

A large industrial scrap charging car, painted red, is positioned in a vast warehouse. The car has a grey metal frame and is equipped with a red crane arm extending upwards. The warehouse has a high ceiling with skylights and industrial lighting. In the background, there are large white roll-up doors and a multi-story industrial building with blue and grey panels and red railings.

## Scrap Charging Cars

A good charging process increases efficiency in melting furnaces. As CitiUS Engineering, we design scrap charging car according to customer requirements to reduce cycle times and maximize aluminium recoveries.

- Chips, bundles, lose profiles, large solids, sows and T-bars.
- Capacity: From 2 to 20 tons.
- Multi-directional charge cars, Rotating and tilting charge cars.
